ABOUT ME

I am a final-year BSc Applied Sciences student focused on Chemistry and Physics. My hands-on skills include laboratory techniques, analytical instrumentation, and GLP compliance. I am proficient with standard lab equipment, formulation handling, and meticulous record-keeping aligned with HSE and safety standards. My academic background is complemented by coursework in Marketing, Operations Management, and Total Quality Management, giving me insight into business practices. I have programming skills in Python, MySQL, JavaScript, PHP, C, and HTML, and am expanding my expertise through a Digital Marketing course. I am detail-oriented, a strong collaborator, and excel at solving technical and analytical problems. I am eager to apply these core skills in a dynamic, growth-oriented team.

EDUCATION

- Rajarata University of Sri Lanka | Feb 2023 - May 2026
Bachelor of Science in Applied Sciences
Specializations - Chemistry, Physics
-

SKILLS

Technical & Laboratory

- Analytical instrumentation: FTIR, UV-Vis spectrophotometry, GC, HPLC, and titration methods
- Formulation handling, reagent preparation, and solution chemistry
- Standard laboratory equipment operation and routine calibration
- Good Laboratory Practice (GLP) and HSE/safety standards compliance
- Sample preparation, quality testing, and accurate data recording

Programming & Digital

- Programming languages: Python, C, MySQL, JavaScript, PHP, HTML
- Currently completing a Digital Marketing course — SEO, content strategy, and campaign management
- Data analysis and scripting using Python and SQL

Business & Management

- Principles and Practices of Marketing — market analysis, consumer behavior, branding
- Operations Management — process optimization, supply chain fundamentals, workflow planning
- Total Quality Management (TQM) — quality frameworks, continuous improvement, ISO principles

Professional & Transferable

- Strong attention to detail and accuracy in scientific and analytical work
 - Effective team collaboration in both laboratory and project environments
 - Scientific report writing, technical documentation, and record-keeping
 - Critical thinking and structured problem-solving under pressure
 - Time management across concurrent academic and practical workstreams
-

PROJECTS

Completed final year individual project on Google Colab Notebook

- Developed a 2D U-Net brain tumor segmentation pipeline with combined focal-dice loss, trained on BraTS 2020 multi-modal MRI data across 101 patients, and conducted a modality ablation study across six MRI configurations that identified T1ce and FLAIR as the most informative sequences for tumor sub-region delineation.

Smart Traffic Light System with Accident Detection (Electronics - Group Project)

- Developed an Arduino Mega 2560-based traffic control system with ultrasonic sensor-based accident detection and automated signal management.

Developed a Comprehensive Marketing Plan

- Developed a comprehensive marketing plan for a conceptual premium bakery brand (*Blissful Bites*), covering STP analysis, Marketing Mix (4Ps), SWOT, PESTEL, Porter's Five Forces, SMART objectives, budget planning, and a Minimum Viable Product (MVP) webpage, as part of the Principles and Practices of Marketing coursework

EXTRA ACTIVITIES

- Played table tennis at school
- Played hockey for the university team

VOLUNTEER EXPERIENCE
